EASY BASE SINGLE

The 600-watt Easy Base Single System is the perfect solution for no-fuss, no-muss sound reinforcement for one-man bands, presentations and speeches in enclosed spaces and small clubs. Comprised of the lightest Elements components and featuring a detachable mid/ high column (2x E 435), this extremely compact rig is a dream to transport.

SMART BASE SINGLE

The Smart Base Single is the most flexibly extendable system and therefore the perfect PA for everything from clubs to small open-air events. A passive E SUB 110 subwoofer may be added on for DJ gigs that require more powerful bass response. A second E 835 mid/ high unit may be installed in place of the mounting pole for open-air stages that call for greater reach in the midrange and high frequencies.

LINE BASE SINGLE

The Line Base Single can do without a mounting pole bar because its column of two E 835 mid/ high units delivers real long-throw performance for large rooms and open-air stages. And if the situation demands a bigger bass foundation, a passive E SUB 110 subwoofer is easily added to the system.

BIG BASE SINGLE

The Big Base Single pairs the power and performance of a large PA with the audio and handling benefits of ELEMENTS. What's more, it is extendable. The 2,400-watt E 210 SUB AS subwoofer can drive up to three E 835 mid/ high units and an added passive subwoofer.

Largest configuration 1,200 watt
 Easy Base Twin
